Mathematical reform is the driving force behind the organization and development of this new college algebra text. The use of technology, primarily graphing utilities, is assumed throughout the text. The development of each topic proceeds from the concrete to the abstract and takes full advantage of technology, wherever appropriate. The first major objective of this book is to encourage students to investigate mathematical ideas and processes graphically and numerically, as well as algebraically. Proceeding in this way, students gain a broader, deeper, and more useful understanding of a concept or process. Even though concept development and technology are emphasized, manipulative skills are not ignored, and plenty of opportunities to practice basic skills are present. A brief look at the table of contents will reveal the importance of the function concept as a unifying theme. The second major objective of this book is the development of a library of elementary functions, including their important properties and uses. Having this library of elementary functions as a basic working tool in their mathematical tool boxes, students will be able to move into calculus with greater confidence and understanding. In addition, a concise review of basic algebraic concepts is included in Appendix A for easy reference, or systematic review. The third major objective of this book is to give the student substantial experience in solving and modeling real world problems. Enough applications are included to convince even the most skeptical student that mathematics is really useful. Most of the applications are simplified versions of actual real-world problems taken from professional journals and professional books. No specialized experience is required to solve any of the applications.

From reader reviews:

Roy Brown:

What do you think of book? It is just for students since they're still students or this for all people in the world, the actual best subject for that? Just you can be answered for that issue above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book Mandatory Package: College Algebra: Graphs and Models w/ MathZone. All type of book are you able to see on many solutions. You can look for the internet solutions or other social media.

Judith Jordan:

Information is provisions for those to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider while those information which is in the former life are hard to be find than now's taking seriously which one works to believe or which one the actual resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Mandatory Package: College Algebra: Graphs and Models w/ MathZone as your daily resource information.

Martin Hobson:

That reserve can make you to feel relax. That book Mandatory Package: College Algebra: Graphs and Models w/ MathZone was multi-colored and of course has pictures around. As we know that book Mandatory Package: College Algebra: Graphs and Models w/ MathZone has many kinds or variety. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that will.

Charline Bynum:

Publication is one of source of know-how. We can add our knowledge from it. Not only for students but in addition native or citizen have to have book to know the change information of year to be able to year. As we know those publications have many advantages. Beside we add our knowledge, can also bring us to around the world. With the book Mandatory Package: College Algebra: Graphs and Models w/ MathZone we can get more advantage. Don't you to be creative people? For being creative person must want to read a book. Just choose the best book that acceptable with your aim. Don't possibly be doubt to change your life by this book Mandatory Package: College Algebra: Graphs and Models w/ MathZone. You can more pleasing than now.
