One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis Dr. Vince M. Bertram

America has been steadily sliding in global education rankings for decades. In particular, our students are increasingly unable to compete globally in STEM (science, technology, engineering, and math) fields. According to the National Assessment of Education Progress (NAEP), in 2010 only 26 percent of high school seniors in the U.S. scored at or above proficient level in math. Another 36 percent were failing. Only 3 percent scored at an advanced level in math, and only 1 percent scored at an advanced level in science.

Students in K-12 across the U.S. struggle with STEM subjects, often because the subjects are poorly presented or badly taught. When students reach college, they choose to pursue non-STEM degrees, and too many struggle to find jobs upon graduation. Meanwhile, U.S. employers are having an increasingly hard time filling STEM jobs. Economic projections for the next decade show we will need approximately 1 million more professionals in STEM fields than our education system will produce. If we want to maintain our historical pre-eminence in science and technology, we must increase the number of students graduating with STEM degrees by 34 percent each year.

One Nation Under Taught offers a clear solution, providing a blueprint for helping students fall in love with STEM subjects, and giving them the tools they need to succeed and go on for further study in these fields. The book challenges our whole way of thinking about education, and encourages educators and policy-makers at all levels to work together to make our schools places that promote curiosity and inspire a love of learning. If we do not change course, we will set our students and our country on the path to a lifetime of poverty. But if we can implement the reforms Dr. Bertram suggests, we can achieve long-lasting prosperity for our children and our nation as a whole.

From reader reviews:

Kenneth Harrell:

This One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis usually are reliable for you who want to be a successful person, why. The reason of this One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis can be on the list of great books you must have is definitely giving you more than just simple looking at food but feed anyone with information that probably will shock your preceding knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed people. Beside that this One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis forcing you to have an enormous of experience like rich vocabulary, giving you test of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Mary Stock:

Playing with family in the park, coming to see the water world or hanging out with pals is thing that usually you have done when you have spare time, after that why you don't try factor that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis, you could enjoy both. It is great combination right, you still need to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't have it, oh come on its called reading friends.

Jennifer Stephens:

Beside this kind of One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis in your phone, it can give you a way to get more close to the new knowledge or info. The information and the knowledge you will got here is fresh from the oven so don't become worry if you feel like an aged people live in narrow commune. It is good thing to have One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis because this book offers to you readable information. Do you sometimes have book but you rarely get what it's interesting features of. Oh come on, that wil happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, including treasuring beautiful island. Use you still want to miss it? Find this book in addition to read it from today!

James Shockley:

With this era which is the greater man or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple approach to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. One of several books in the top listing in your reading list is usually One Nation Under Taught: Solving America's Science, Technology, Engineering & Math Crisis. This book that is qualified as The Hungry Inclines can get you

closer in turning into precious person. By looking right up and review this guide you can get many advantages.
