Alternative Energy Sources (Green Energy and Technology)

Efstathios E. Stathis Michaelides

Alternative Energy Sources (Green Energy and Technology) Efstathios E. Stathis Michaelides

Alternative Energy Sources is designed to give the reader, a clear view of the role each form of alternative energy may play in supplying the energy needs of the human society in the near future (20-50 years).

The two first chapters on "energy demand and supply" and "environmental effects," set the tone as to why alternative energy is essential for the future. The third chapter gives the laws of energy conversion processes, as well as the limitations of converting one energy form to another. The section on exergy gives a quantitative background on the capability/potential of each energy source to produce power. The fourth, fifth and sixth chapters are expositions of fission and fusion nuclear energy, the power plants that may produce power from these sources and the issues that will frame the public debate on nuclear energy. The following five chapters include descriptions of the most common renewable energy sources (wind, solar, geothermal, biomass, hydroelectric) some of the less common sources (e.g. tidal and wave energy). The emphasis of these chapters will be on the global potential of each source, the engineering/technical systems that are used in harnessing the potential of each source, the technological developments that will contribute to wider utilization of the sources and environmental effects associated with their wider use. The last three chapters are: "energy storage," which will become an important issue if renewable energy sources are used widely.

The fourteen chapters in the book have been chosen so that one may fit a semester University course around this book. At the end of every chapter, there are 10-20 problems and 1-3 suggestions of semester projects that may be assigned to students for further research.

From reader reviews:

Nannie Hernandez:

Throughout other case, little men and women like to read book Alternative Energy Sources (Green Energy and Technology). You can choose the best book if you want reading a book. Providing we know about how is important some sort of book Alternative Energy Sources (Green Energy and Technology). You can add knowledge and of course you can around the world with a book. Absolutely right, since from book you can understand everything! From your country until eventually foreign or abroad you can be known. About simple issue until wonderful thing it is possible to know that. In this era, we can easily open a book or even searching by internet unit. It is called e-book. You may use it when you feel uninterested to go to the library. Let's go through.

Irving Wile:

Hey guys, do you really wants to finds a new book to see? May be the book with the headline Alternative Energy Sources (Green Energy and Technology) suitable to you? The actual book was written by well-known writer in this era. The actual book untitled Alternative Energy Sources (Green Energy and Technology) is the main of several books that everyone read now. This particular book was inspired lots of people in the world. When you read this book you will enter the new dimension that you ever know previous to. The author explained their concept in the simple way, so all of people can easily to know the core of this guide. This book will give you a lots of information about this world now. So that you can see the represented of the world on this book.

Phyllis Smith:

Playing with family within a park, coming to see the ocean world or hanging out with close friends is thing that usually you might have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Alternative Energy Sources (Green Energy and Technology), you are able to enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout guys. What? Still don't get it, oh come on its known as reading friends.

Shirley Bishop:

Many people spending their time by playing outside along with friends, fun activity having family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading through a book. Ugh, you think reading a book can actually hard because you have to use the book everywhere? It all right you can have the e-book, getting everywhere you want in your Touch screen phone. Like Alternative Energy Sources (Green Energy and Technology) which is having the e-book version. So, why not try out this book? Let's see.
