Identification of Continuous-time Models from Sampled Data (Advances in Industrial Control)

Identification of Continuous-time Models from Sampled Data (Advances in Industrial Control)

This is the first book dedicated to direct continuous-time model identification for 15 years. It cuts down on time spent hunting through journals by providing an overview of much recent research in an increasingly busy field. The CONTSID toolbox discussed in the final chapter gives an overview of developments and practical examples in which MATLAB® can be used for direct time-domain identification of continuous-time systems. This is a valuable reference for a broad audience.
