Statistical Methods for Speech Recognition (Language, Speech, and Communication)

Frederick Jelinek

Statistical Methods for Speech Recognition (Language, Speech, and Communication) Frederick Jelinek

This book reflects decades of important research on the mathematical foundations of speech recognition. It focuses on underlying statistical techniques such as hidden Markov models, decision trees, the expectation-maximization algorithm, information theoretic goodness criteria, maximum entropy probability estimation, parameter and data clustering, and smoothing of probability distributions. The author's goal is to present these principles clearly in the simplest setting, to show the advantages of self-organization from real data, and to enable the reader to apply the techniques.

From reader reviews:

Larry Swartz:

Have you spare time for any day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or read a book allowed Statistical Methods for Speech Recognition (Language, Speech, and Communication)? Maybe it is to get best activity for you. You already know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have various other opinion?

Ariane Swanson:

This book untitled Statistical Methods for Speech Recognition (Language, Speech, and Communication) to be one of several books in which best seller in this year, that is because when you read this book you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail outlet or you can order it through online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smart phone. So there is no reason to your account to past this publication from your list.

Anna Bailey:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your moment to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are having problem with the book as compared to can satisfy your short time to read it because this all time you only find publication that need more time to be study. Statistical Methods for Speech Recognition (Language, Speech, and Communication) can be your answer given it can be read by a person who have those short spare time problems.

Tamara Reams:

As we know that book is important thing to add our expertise for everything. By a reserve we can know everything you want. A book is a pair of written, printed, illustrated or even blank sheet. Every year has been exactly added. This reserve Statistical Methods for Speech Recognition (Language, Speech, and Communication) was filled with regards to science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit of a book, you can feel enjoy to read a reserve. In the modern era like today, many ways to get book which you wanted.
