James R. Sanders, The Joint Committee on Standards for Educational Evaluation

The **Second Edition** of this volume is the result of an extensive review process by the Joint Committee of the original **Standards for Evaluations of Educational Programs, Projects, and Materials** published in 1981. The 30 standards are divided into four groups corresponding to the attributes of fair programme evaluation - utility; feasibility; propriety; and accuracy. In this new edition original standards have been combined and others added, with new case illustrations featuring applications of the standards to reform efforts in a diverse range of settings including schools, universities, law, medicine, nursing, business and social service agencies. Taken as a set, the **Standards** provide a working philosophy for evaluators.
