One Thousand Exercises in Probability by Grimmett, Geoffrey R., Stirzaker, David R. 2nd (second) Revised edition [Paperback(2001)]

One Thousand Exercises in Probability by Grimmett, Geoffrey R., Stirzaker, David R. 2nd (second) Revised edition [Paperback(2001)]

This book is a revised, updated and greatly expanded version of the authors "Probability and Random Processes: Problems and Solutions", first published in 1992. The 1000+ exercises contained within are not merely drill problems but have been chosen to illustrate the concepts, illuminate the subject, and both inform and entertain the student. Topics cover a broad range of subjects, including: elementary aspects of probability and random variables; sampling; Markov chains; convergence; stationary processes; renewals; queues; Martingales; diffusion; mathematical finance and the Black-Scholes model. This text is intended for general use, and to serve students as a companion text for elementary, intermediate and advanced courses in probability and random processes. Useful for anyone needing a large source of problems in these areas and at all levels. This book also acts as a companion volume to the new edition of Probability and Random Processes 3/e, (OUP - 2001), providing the solutions for the problems and exercises.
