Chiral Separation Methods for Pharmaceutical and Biotechnological Products

Chiral Separation Methods for Pharmaceutical and Biotechnological Products

Discusses chiral separations and offers guidance for selecting the optimum method for desired results

Chiral separations represent the most intriguing and, by some measures, most difficult separations of chemical compounds. This book provides researchers and students an understanding of chiral separations and offers a convenient route to selecting the best separation method, saving considerable time and cost in product development.

Considering chiral separations in the biotechnological and pharmaceutical industries, as well as for food applications, Dr. Ahuja provides insights into a broad range of topics. Opening with a broad overview of chiral separations, regulatory considerations in drug product development, and basic issues in method development, the book:

- Covers a variety of modern methods such as gas chromatography, high performance liquid chromatography, supercritical fluid chromatography, and capillary electrophoresis
- Deals with the impact of chirality on the biological activity of small and large molecules
- Provides detailed information on useful chiral stationary phases (CSPs) for HPLC
- Includes handy information on selection of an appropriate CSP, including mechanistic studies
- Offers strategies for fast method development with HPLC, SFC, and CE
- Discusses preparatory methods utilized in the pharmaceutical industry

With in-depth discussions of the current state of the field as well as suggestions to assist future developments, *Chiral Separation Methods for Pharmaceutical and Biotechnological Products* is an essential text for laboratory investigators, managers, and regulators who are involved in chiral separations in the pharmaceutical industry, as well as students preparing for careers in these fields.

From reader reviews:

Rex Pelkey:

This Chiral Separation Methods for Pharmaceutical and Biotechnological Products book is simply not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is usually information inside this publication incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This kind of Chiral Separation Methods for Pharmaceutical and Biotechnological Products without we know teach the one who looking at it become critical in contemplating and analyzing. Don't become worry Chiral Separation Methods for Pharmaceutical and Biotechnological Products can bring any time you are and not make your case space or bookshelves' become full because you can have it inside your lovely laptop even telephone. This Chiral Separation Methods for Pharmaceutical and Biotechnological Products having excellent arrangement in word in addition to layout, so you will not experience uninterested in reading.

Michelle Favors:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you wish to try to find a new activity this is look different you can read any book. It is really fun to suit your needs. If you enjoy the book you read you can spent 24 hours a day to reading a publication. The book Chiral Separation Methods for Pharmaceutical and Biotechnological Products it is quite good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. In case you did not have enough space bringing this book you can buy the actual e-book. You can m0ore easily to read this book out of your smart phone. The price is not very costly but this book features high quality.

Marylou Standley:

Reading a book to be new life style in this yr; every people loves to learn a book. When you study a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, and soon. The Chiral Separation Methods for Pharmaceutical and Biotechnological Products offer you a new experience in looking at a book.

Jennifer David:

As a scholar exactly feel bored for you to reading. If their teacher inquired them to go to the library or even make summary for some guide, they are complained. Just small students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to at this time there but nothing

reading very seriously. Any students feel that studying is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Chiral Separation Methods for Pharmaceutical and Biotechnological Products can make you sense more interested to read.
