This allows readers to see the overall picture at a glance and find answers to the core questions:

- What is the pollution problem, and what are its sources?
- What is the "big picture," or what background knowledge do we need?
- How can we diagnose the problem, both qualitatively and quantitatively, using monitoring and ecological models, indicators, and services?
- How can we solve the problem with environmental technology, ecotechnology, cleaner technology, and environmental legislation?
- How do we address the problem as part of an integrated management strategy?
