It's a small attention span world out there, and not everyone's interested in paging through lengthy tomes to deepen their intellect. They want their information. And they want it *now*.

This book fills that void next to the recliner as the go-to reference whenever work conversations or bar trivia have you feeling stupid. The top ten academic subjects are broken into digestible pieces such as:

- Fast Facts: One-liners that delivers important information
- Repeatable Quotables: Smart words by smart people to make readers look smart by repeating
- Visual Aids: Graphs, charts, and tables for when even a few words are way too much
- Cheat Sheets: Chapter-ending recaps that reinforce the major points to take away

Whether they want an answer to a biology question, or to brush up on their Spanish during a commercial break, this book is perfect for people who couldn't bother paying attention the first time.
