Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials) Vinod K. Wadhawan

A structure is an assembly that serves an engineering function. A smart structure is one that serves this function smartly i.e. by responding adaptively in a pre-designed useful and efficient manner to changing environmental conditions. Adaptive behavior of one or more materials constituting a smart structure requires nonlinear response. This book describes the three main types of nonlinear-response materials: ferroic materials, smart materials, and nanostructured materials. Information processing by biological and artificial smart structures is also discussed. A smart structure typically has sensors, actuators and a control system. Progress in all these aspects of smart structures has leaned heavily on mimicking Nature and the all-important notion in this context has been that of evolution. Artificial Darwinian and Lamarckian evolution holds the key to the development of truly smart structures. Modestly intelligent robots are already on the horizon. Projections about the low cost availability of adequate computing power and memory size indicate that the future really belongs to smart structures. This book covers in a compact format the entire gamut of concepts relevant to smart structures. It will be of interest to a wide range of students and professionals in science and engineering.

From reader reviews:

Arnold Browning:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each publication has different aim or maybe goal; it means that guide has different type. Some people truly feel enjoy to spend their time for you to read a book. They are really reading whatever they take because their hobby is reading a book. What about the person who don't like studying a book? Sometime, person feel need book once they found difficult problem as well as exercise. Well, probably you'll have this Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials).

Phyllis Force:

The book Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials)? A few of you have a different opinion about guide. But one aim this book can give many information for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or details that you take for that, you could give for each other; you can share all of these. Book Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials) has simple shape but you know: it has great and large function for you. You can search the enormous world by open up and read a reserve. So it is very wonderful.

Quentin Taylor:

As people who live in often the modest era should be update about what going on or data even knowledge to make all of them keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by reading through books. It is a good choice for yourself but the problems coming to a person is you don't know which one you should start with. This Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials) is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Marian Buell:

Are you kind of busy person, only have 10 as well as 15 minute in your moment to upgrading your mind talent or thinking skill also analytical thinking? Then you are having problem with the book in comparison with can satisfy your short period of time to read it because this all time you only find reserve that need more time to be learn. Smart Structures: Blurring the Distinction Between the Living and the Nonliving (Monographs on the Physics and Chemistry of Materials) can be your answer since it can be read by an

individual who have those short spare time problems.
